

## MO HEALTHNET SOAP WEBSERVICES TRADING PARTNER AGREEMENT

This document constitutes a Trading Partner Agreement (TPA) between the submitter, the State of Missouri, and the Fiscal Agent Infocrossing, Inc. for the purpose of exchanging information and electronic transactions related to the submission of MO HealthNet data. Simple Object Access Protocol (SOAP) is a structured XML based protocol for communicating with WebServices over a computer network. SOAP utilizes Hypertext Transfer Protocol over SSL (HTTP/S) for message transmission.

The submitter desires to exchange claims and billing information electronically with the State of Missouri, and Infocrossing, Inc. All electronic transactions may contain Protected Health Information (PHI) as defined under the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The submitter agrees to safeguard and process any and all PHI or other data received, transmitted, or accessed electronically to or from the State of Missouri and Infocrossing, Inc. in accordance with HIPAA and the Health Information Technology for Economic and Clinical Health Act as requirements applicable to the submitter, including guidelines defined in the HIPAA Accredited Standards Committee (ASC) X12 transaction implementation guides. If the submitter identifies PHI data not intended for its use, they will immediately notify the Wipro Technical Help Desk to arrange for its return, retransmission, or destruction.

Committee on Operating Rules for Information Exchange (CORE)-certified and CORE compliant entities must be able to implement HTTP/S Version 1.1 over the public Internet as a transportation method for ASC X12N 270/271 (005010X279A1) and ASC X12N 276/277 (005010X212), and ASC X12N 835 (005010X221) transactions. HTTP/S is a secure, reliable, ubiquitous protocol that has a proven record of support for high-volume real time and batch transaction exchange and security in healthcare and other industries. (CORE Rule 153 v1.1.0 and CORE Rule 350 v3.0.0) Included is a means of more prescriptive submitter authentication, envelope specifications, and metadata. (CORE Rule 270 v2.2.0 and CORE Rule 350 v3.0.0) A Safe Harbor is applicable when an entity uses, conducts or processes the X12 270/271 Eligibility and Benefits, Implementation Acknowledgement X12 999, X12 276/277 Claim Status, and X12 835 Claim Payment/Advice transactions.

This Trading Partner Agreement shall be interpreted to be consistent with the HIPAA requirements on trading partner agreements found at 45 CFR § 162.915. Termination or expiration of this Agreement does not relieve either party of its obligations under federal and state laws, and regulations pertaining to the privacy and security of PHI, nor its obligations regarding the confidentiality of such information.

The Trading Partner Agreement is required to be a faxed submission. Please fax the completed form to 573-635-0316.

### TRADING PARTNER AGREEMENT REQUIREMENTS
